

mosquito® Head Lice Detergent

Prevents head louse infestations - effective for up to 12 hours.

mosquito® Head Lice Repellent Spray can offer up to 12 hours of protection against head lice, provided it is not washed out of the hair. mosquito® Head Lice Repellent Spray is suitable for children aged 12 months or older.

Active ingredient

20g/100g IR 3535 (Ethylbutylacetylaminopropionate), 2g/100g Icaridin

Instructions for use

mosquito® Head Lice Repellent Spray is designed as a preventative in the event of possible contact with persons with head lice (e.g. on the bus or train, at school or in kindergarten). Spray all the hair with a sufficient amount of mosquito® Head Lice Repellent Spray so that it is moist and fully covered. Spread the spray on the hair and scalp, e.g. with a brush. Make sure to apply the product carefully to the nape of the neck and behind the ears. Allow the product to dry in naturally or briefly use a hairdryer (prolonged use of a hairdryer causes the active ingredient to evaporate, reducing the effective period). Tip: Head coverings and the collars of clothing should also be treated with the spray as a precautionary measure.

Dosage / application amount

Apply between 5 and 15 ml (approx. 30 to 90 spray jets), depending on the length and thickness of the hair.

Pregnancy or breastfeeding

No sufficient information is available that contraindicates use during pregnancy or when breastfeeding. Before breastfeeding, make sure to wash treated parts of the body.

Caution

- The product is designed solely for external use and should not be ingested or inhaled.
- Avoid contact with the eyes and mucous membranes; rinse any affected areas with plenty of water and seek medical attention.
- Causes severe irritation of the eyes.
- Do not use on damaged or injured skin.
- If the hair gets wet (due to washing or rain for example), the spray must be reapplied.
- Keep the product out of reach of children.
- Only use in well-ventilated areas; avoid inhaling the spray.
- If you need to consult a doctor, please show them the label.
- Protect from heat, cold and direct sunlight.
- Empty containers should be sent for recycling.

Use repellents safely. Before use always read the label and product information carefully.
